per month

## KUDOS<sup>®</sup> VR Headset with supporting straps

Dimensions: 12cm (H) x 19.5cm (W) x 28cm-33cm (D)

The VR Headset intelligently captures the exact way a patient looks at objects and the world around them. KUDOS analyses all points and directions of gaze, capturing near, intermediate and distance focal lengths. The outcome is a KUDOS lens offering wider natural vision, with minimal oblique astigmatism.

### KUDOS<sup>®</sup> Freestanding Unit with built in screen & stool

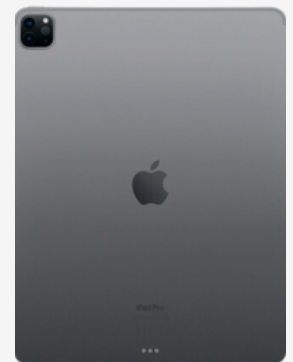

Dimensions: 182cm (H) x 65cm (W) x 50cm (D)

The **Freestanding Unit** and **Apple iPad Pro** are not mandatory, however we highly recommend selecting our Diamond Package to provide you with all the essential tools for effectively showcasing KUDOS to your customers.

### Apple iPad Pro with KUDOS case & app for measurements

Dimensions: 11inch display

The app measures Pupil Distances, Heights, Back Vertex Distance, Pantoscopic Tilt and Frame Bow. It can also help to demonstrate estimated lens thicknesses.
