**BUY NOW & PAY NOTHING FOR 9 MONTHS!**

**REQUEST A QUOTE NOW** 

Our fantastic offer allows you to take delivery of a brand new **Daytona, California** or **Monaco** and **pay nothing for the first 9 months** of your finance agreement. This not only allows you to generate an increased profit from day one, but also preserves cash flow.

**Daytona** produces a 200° single-capture **optomap®** retinal image of unrivalled clarity in less than ½ second.

This fast, easy, patient friendly, ultra-widefield imaging technology was designed for healthy eye screening and has been shown to improve practice flow and patient engagement.

**California** was developed to facilitate comprehensive eye exams, document findings, and assist eye care professionals in disease management and treatment, and **now offers** imaging modalities including **optomap color rgb**.

Created in close collaboration with eyecare professionals, this latest ultra-widefield modality provides additional retinal visualization to support treatment and ongoing care.

**Monaco** provides an exciting new way to enhance your clinical exam. It's the only ultra-widefield imaging device with integrated OCT, producing a single-capture **optomap** image and also provides cross-sectional OCT views of retinal structures.

Monaco enables a rapid multi-modality capture featuring colour, autofluorescence, and OCT scans, for both eyes, in as little as two minutes.
