Eyetelligence AI Screening Software

with retinal camera, surface tablet
and 200 patient reports incl.

Specialised AI screening solutions for the medical industry

Optain is an international MedTech company,
developing advanced AI software solutions.

Eyetelligence Assure software analyses full-colour fundus images to screen for referable eye diseases including glaucoma, diabetic retinopathy, and age-related macular degeneration. Additionally, the technology can screen for cardiovascular diseases and provide a risk assessment profile. Our vision is to harness the power of AI to provide affordable clinical support tools that make disease screening easy, anytime, anywhere.
